

STATEMENT

I, the undersigned Jacques Moreau, Director of Cefedem Rhône-Alpes, hereby certify that Stéphane Jacquet, born on 25 March 1971 in Gonesse (France), got from our institution in June 2007, the State diploma of music teacher, which is a higher education diploma in pedagogy and music education.

The Cefedem Rhône-Alpes Institution was created by the Ministry of Culture in 1990. It is part of the Ministry of Culture higher education area. It is, on a regular basis, authorized by the Ministry of Culture to deliver the State diploma of music teacher. This degree is now governed by the Decree 2011-475 on 28 April 2011 and the ministerial order of 5 May 2011. This degree is in the field of higher education in music, developed in partnership with the University.

The State diploma of music teacher is defined by that order in the following terms:

- This degree is listed in the national directory of professional certification and is also integrated into the European High Education Area by the issuance of 120 ECTS;
- The access to the training which delivers the diploma, is subject to successful completion of an entrance examination that is accessible only to the graduates of national studies in music (*Diplôme d'Études Musicales – DEM*). This diploma of national studies in music is issued by the national regional conservatoires, at higher instrumental level. Many of those institutions are members of the European Association of Conservatories (AEC), which members are all higher education institutions of music, whether independent conservatoires or university departments.
- To allow this degree, the training focuses on: practice of music, musical culture, educational practice and pedagogical culture. It is a training of 900 hours.

All work Stéphane Jacquet had to perform for the Degree mainly concerns general education and music education. In addition, Stéphane Jacquet made several final tests assessed by a professional panel chaired by a ministry inspector.

By all the skills and competences that are acquired by the students, this Diploma corresponds to a high level of educational qualification. To teach music in conservatoires and music schools throughout the French territory, it is necessary to be graduated with that Degree. This qualification corresponds to the larger employment market in France for music teachers.

Established in Lyon on December 2, 2012, and to assert that right,

For Cefedem Rhône-Alpes,

Jacques Moreau
Director
